Pro Series Car Pack

The Pro series will be restricted to the following car pack:

Virtual Drift Championship 5.0 Cars - <https://linktr.ee/virtualdriftchampionship>

- livery mods will be allowed.
- You can save the logo below for use on your vehicle .

Last season we tried using custom cars between everyone, but the issue was late submissions, physics combinations that easily gave an advantage over the other vehicles by combining the best of the best into one car, or by having non legitimate physics.. This is going to be completely avoided this season by doing this in the restricted manner, and leaving it to the VDC pack. This also enables a greater scope of players to partake in our series by not having to redownload updates to vehicles or car packs every other session join.

Possibly a Spec-D VDC car pack will be released after the season, and may be used in the future.
